AQUA RENEW

Is a dual purpose product that cleans marble, granite, terrazzo, all masonry surfaces as well as rust. It quickly penetrates masonry surfaces to lift out the most stubborn grime and corrosion.

AQUA RENEW

Conditions metal as it cleans. This special compound of solvents and detergents, degreases and removes oxides leaving a passivated surface, microscopically etched to absorb and hold protective coatings. Use safely on all steel, iron and aluminium surfaces.

SAFETY INSTRUCTIONS:

If poisoning occurs contact a doctor or poisons information centre. If swallowed, DO NOT INDUCE VOMITING. Give a glass of water. If skin contact occurs, remove contaminated clothing and wash skin thoroughly. If in eyes, hold eye lids open, flood with water for 15 minutes and see a doctor.

CAUTION:

Avoid contact with glass, porcelain, highly polished stone surfaces, chromium, tin, galvanised or nickel plated metals.

AQUA RENEW

**MASONRY RESTORER
AND RUST CONVERTER**

- BIODEGRADABLE
- FREE RINSING
- FAST ACTING
- NON ABRASIVE

Contains 309/L Phosphoric Acid

DIRECTIONS

RUST:

Clean off excess grease and rust then dilute 1 part AQUA RENEW with up to 3 parts water. Apply the solution by mop or brush. Let the solution stand until the corrosion and rust have been dissolved. Rinse with clear water and allow to dry. Apply protection coating.

For heavy rust corrosion, chip heavy rust off. Scratch brush the surface. Dilute 1 part AQUA RENEW with up to 3 parts water, preferably with a polythene container. Apply to the surface with a soft bristle brush. When dry, surface is neutral and ready for a protective coat of paint. Rinse thoroughly after removal.

MASONRY:

Dilute 1 part AQUA RENEW with up to 10 parts water and apply with brush or sponge. Scrub where necessary, allow to work for 3 - 5 minutes and rinse off thoroughly. For extreme cases of corrosion a stronger solution may be necessary or a second application of the diluted solution.
