

GRANULES

Ecoworkz products provide a safer, environmentally friendly alternative to other maintenance and hygiene products. Made from natural and renewable resources using patented technology Ecoworkz products are highly concentrated ensuring effective results and economic benefits for the user.

StableGuard Granules is a granular product specifically formulated for use in horse stables and associated buildings. Designed to absorb odours and liquids **StableGuard Granules** will give effective and sustained efficacy in sanitation, odour control and the overall maintenance and hygiene standards necessary for sound animal husbandry practices.

There is a direct correlation between stable cleanliness and the incidence of insect pests and diseases.

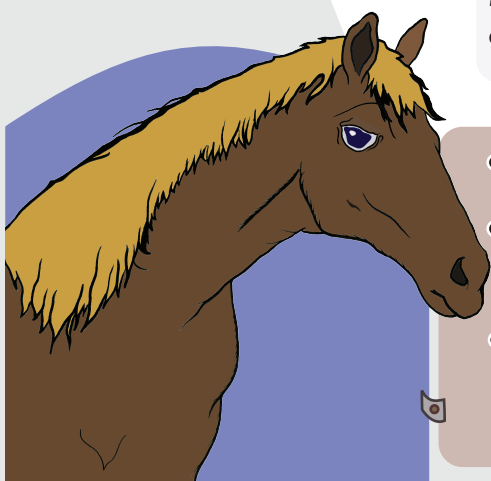

When used in accordance with the directions **StableGuard Granules** will;

- **Ensure effective sanitation**
- **Absorb liquids**
- **Remove contamination sources**
- **Control Odour**

StableGuard Granules provide a natural, non toxic barrier against disease carrying vectors, soil born diseases and cross infection whilst being safe to the animal and safe for the user.

Using Ecoworkz products enables you to make a positive contribution to the environment without compromising on quality.
